

IBM RDX[®] Removable Hard Disk Storage System

Quickly protecting your business or personal data, the IBM RDX[®] removable hard disk storage system contains a 2.5-inch hard disk drive that offers all of the advantages of disk-to-disk storage, including high performance and a low-failure rate. The system is available in 160GB to 500GB and provides both forward and backward compatibility.

Fast, efficient performance, so data backups integrate easily into the business day.

- Instant random access to data
- Back up 90GB of data per hour
- Transfers data up to 25MB/sec.
- Data restores in seconds rather than hours

A solution that is compatible with all major backup applications.

- EMC Retrospect
- Symantec[®] Backup Exec
- Yosemite Backup

Docking Station

- Internal and External offerings
- Plug & Play USB connectivity
- Investment Protection: Carrier will support future generations/capacities of cartridges
- External Unit has protective bumpers allowing for vertical or horizontal stacking

RDX Cartridge

- Shock, vibration, static protection
- Protection from drops up to 1 meter
- Write protect switch

Warranty

- Internal Dock assumes server base warranty and subsequent ServicePac[®] upgrades
- External Dock warranty is three years
- The cartridge assumes the dock warranty

| Description | IBM Part Number |
